Descriptive list of

# THE HEDGE BEAUTIFUL

plants

Hedges have always appealed to the lover of beauty. As a division between properties, or for screening out unsightly objects, nothing can take the place of the hedge. as this adds the finishing touch to the home surroundings.

## WHICH SHALL IT BE

There is a wide VARIETY of material available.

**EVERGREEN.** When an Evergreen hedge is desired AMERICAN ARBOR VITÆ is the ideal plant. Looks attractive from the moment that it is planted.

The foliage is feathery and becomes more dense after every shearing. Write for prices.

## DECIDUOUS MATERIAL

**POLISH PRIVET.** The hardiest and handsomest of the Privets. Of rapid, upright growth; with rich, glossy, green foliage, and delightfully fragrant, white flowers in June. Very desirable where an upright growing hedge is desired. Owing to its hardiness this Privet fills a long-felt want in Northern landscape work.

**THUNBERG'S BARBERRY.** This excellent Shrub from Japan, with its round, drooping, branches, thickly set with small, rich green, ovate leaves, turning into brilliant colors of many shades in autumn. It is very desirable where a hedge of medium height is desired.

**SPIRÆ VAN HOUTEI.** With graceful, drooping branches; loaded with clusters of white flowers in May. Too well known to require description.

**MOCK ORANGE.** Of quick, handsome, upright growth. Medium tall Shrubs with rich, brown bark and large white blossoms.

**WHITE TARTARIAN BUSH HONEYSUCKLE.** Very suitable for backgrounds; tall Hedges and screening. Their wealth of white flowers in May is followed by masses of red berries.

**PRICES.** Any of the above deciduous Hedge material, 12 to 18 inch plants, 30 cents each postpaid. For larger plants or specimen bushes write for prices.
